

Clark Forklift

Performing worldwide, there are now 350,000 Clark forklifts and lift trucks in operation, with in excess of 250,000 of those operating in North America. Clark has five main lines of forklifts across the world, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 distinctive models of forklifts, with components covering more than 120,000 particular components for all of its automated equipment. Your regional Clark Supplier is your complete source for availability of all your components needs offered by Clark Totalift.

Clark features a extraordinary Parts Distribution team. The items warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their buyers and their dealers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to offer the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to improving productivity and benefiting performance.

Clark Totalift has a really amazing intercontinental support network. With over 550 locations globally, seller representation in over 80 countries and 230 locations in North America, their high level of commitment to their consumers predominates the materials handling market.

Clark proudly remains an progressive leader of the material handling industry, revolutionizing safety features such as the operator restraint system. This exceptional dedication to safety is currently a standard feature on every forklift.

Clark has a unrelenting goal to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its production facilities. Additionally, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any environmental limitations, thus placing them in a dominant industry position.

Lean Manufacturing

Clark has selected the structure of "Lean Manufacturing" at all of its assembly facilities because this system is extremely economical and enables minimal use of resources. Developed to ensure maximum efficiency, this system is intended to find and acknowledge the most effective methods for production facility stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Engine Design

Clark's product engineers and suppliers communicate together to enhance the proficiency and excellence of their merchandise while minimizing costs. The new value engineering agenda combines modern product improvement and delivers improved consumer support and service within the industry.
