

Fort McMurray Aerial Lift Train the Trainer

Fort McMurray Aerial Lift Train the Trainer - The train the trainer program for aerial lifts helps to teach the trainers how to safely train potential operators in an industrial surroundings. Trainers would be given in-depth instruction about the workings of aerial lift equipment. The program is provided on an open enrollment basis and delivered at selected training sites. Prior to certification, trainers are evaluated and graded on their demonstrated skills and understanding.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the best training provider within the business, we offer top notch hands-on training. We give lots of chances to practice the techniques and concepts that are taught inside the classroom. Together with hands-on experience, trainers develop general understanding of machine theory and instructional methods, field and classroom communication skills, and ability to successfully train and evaluate operators. Trainers would gain an understanding of what traits make an effective trainer.

The Aerial Lift Train the Trainer Certification Program teaches the instructional methods included in communicating concepts in a classroom and/or field condition. Knowledge requires a training part to be effectual in workplace conditions. There are three aspects of machinery operation which the trainer must learn how to convey to operators: what to carry out; how to do it; and why it has to be carried out.

The program provides up-to-date, detailed reference material to help trainers convey the subject matter to equipment operators. Manuals contain detailed information about all aspects of industrial mobile equipment operator training. Incorporated within the package are training aids which provide a visual reference in order to enhance the learning experience. The equipment-specific training products include essential materials for both the trainer and the operator: videos/DVD's, overhead transparencies, equipment models, safety message posters; stability pyramids and digital training aids.
