Forklift Training Guidelines
It is vital that all workplaces utilizing forklifts have the checklist below or one equivalent on the premises. If all of the safety regulations are being followed, each of these questions should be answered with a "yes". A "no" to whatever question indicates a procedural flaw which could result in damage to equipment, accident or injury.

1) Is the pedestrian traffic separated from the forklift working area?
2) Is access by pedestrians to forklift areas restricted by a barrier?
3) The pedestrian walkways well-marked?
4) A sign is visibly clear stating a "forklift in operation"?
5) There are mirrors provided at blind spots for pedestrians and operators?
6) Are alterations to daily lift truck schedules communicated to all affected employees?
7) The forklift tires being utilized are suitable for all operating surfaces?
8) Is the seatbelt being utilized?
9) The forklift seat is in good condition?
10) Is a regular forklift maintenance schedule followed?
11) Are yearly checks of the forklift being done?
12) Is the type of forklift right for the job?
13) Does forklift has a readable load chart?
14) Can the operators understand and read the load chart?
15) Does the chart list the safe capacity for different attachments and uses?
16) Are the warning devices on the forklift working properly?
17) Is the operating speed control device fitted correctly?
18) The lift truck overhead cage is fitted properly?
19) Do the operators of the lift truck have certifications to operate the equipment?
20) Speed limits and warning signs are being observed?
21) Are lift truck operators up to date on training for all kinds of forklifts being used?
22) Forklift operators understand their responsibilities to report the damage to the machinery and other lift truck accidents?
23) Prior to the equipment being operated, the pre-test checklist is being reviewed each and every day?
