

Fort McMurray Boom Lift License

Fort McMurray Boom Lift License - To operate an aerial boom lift, operators should be licensed through training that could be obtained utilizing both practical training and classroom sessions and by obtaining a boom lift license. Instruction should be given with respect to the kind of aerial lift which would be used on the job. A License is required for any person who operates or works on an aerial boom lift.

Vehicle-mounted aerial devices include the following work vehicles: aerial ladders, extensible boom platforms, articulating boom platforms, vertical towers, and whichever combination of these types.

There are a number of basic safety rules that apply to all boom lifts. Worker safety whilst in the basket is a top priority. Workers must have on a body harness and lanyard connected to the basket or boom. Never tie off to an equipment, an adjacent pole or a structure. Workers must stand on the basket floor, and never sit or climb on the edge of the basket. The load restrictions of the manufacturer must be followed.

Lift operators have to be authorized to operate an aerial lift. The manufacturer's instruction manual should be kept within the lift and the operator needs to know all aspects of that particular unit. Operators are responsible for ensuring that safety procedures are followed in operating the lift. Testing lift controls everyday should be carried out. Position outriggers and set brakes (if they are used) on pads or a stable surface. When working on a slope, utilize wheel chocks.

Never move an aerial lift truck with an elevated boom while personnel are inside the basket. Extensible boom platforms and articulating boom used as employees carriers should have accessible, plainly marked, upper controls. Except in emergency cases, lower controls must not be utilized to override upper controls unless the person within the lift gives consent.

Do not wear pole or tree climbers shall whilst working from an aerial lift.

The insulated part of the aerial lift must not be altered.

Ensure that the booms are thoroughly inspected, that the machinery is correctly cradled and the outriggers are in the stowed position before moving.

When operating a boom lift next to power lines, make sure that the lines are di-electrically tested according to local rules.
