

Fort McMurray Counterbalance Forklift License

Fort McMurray Counterbalance Forklift License - Forklifts, when operated by completely trained employees, are a major asset to businesses. We provide a comprehensive training program covering all parts of operating a powered lift machinery. Counterbalance forklift training offers operators of forklifts with the understanding and practical skills required to operate forklifts efficiently and safely. The program provides a combination of classroom theory, participant observation and hands-on training within a warehouse-type atmosphere. Training could be customized and/or on site.

The course comprises the fundamentals of powered lift trucks, like for example rules and regulations, components, load centres and factors affecting stability. General operating procedures are taught, such as startup, circle check, forward/reverse on level ground, shutdown, and operating around other individuals. Load handling subject matters consist of selection of loads, load pickup and placements, loading and off-loading trailers and load security and integrity. Individuals participating would learn operational maintenance procedures, like for instance recharging and refueling. Safety concerns within the workplace would be talked about. Individuals participating would learn about the environmental conditions affecting lift truck performance and be able to recognize potential hazards. Advanced training on propane handling could be incorporated.

Employers and their employees could face penalties if they do not operate according to national and industry standards. Employees operating a counterbalance forklift will have to be knowledgeable about the safe operation rules of their forklift. Training is suggested for anybody applying for work which requires forklift operation.

Inside our small personalized classes, we offer both hands-on training and in-class theory. The options for personalized training will comprise refresher or entry level courses.
